

# Going full circle: Potential, quality and care

Peptan® collagen peptides are **Upcycled Certified®** across all sources:

## Why does this matter?

Because upcycling means 100% of nature's goodness reaches its full promise. Rousselot's production system takes materials that would potentially be discarded, ensuring they are transformed into high-value, science-backed ingredients that deliver multiple health and well-being benefits.

## Responsible sourcing: The art of balance

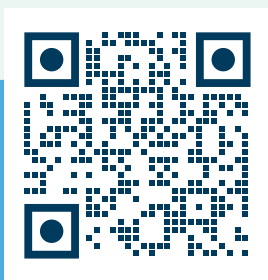

Push and pull, give and take; delivering a reliable and sustainable supply of premium quality collagen involves a careful mix of sourcing, replenishing and preserving. Across all its Peptan collagen ingredients and origins, Rousselot harnesses adaptable sourcing techniques to deliver the solutions customers need, without depleting vital natural resources.

potential

# PEPTAN F: premium fish collagen

Peptan F perfectly exemplifies Rousselot's responsible approach to balanced sourcing.

Aquatic environments are among the most delicate ecosystems in the natural world. Rousselot does everything it can to preserve them and responsibly manage fish stocks while assuring a stable supply of ingredients. Besides guaranteeing all materials derived from fish are utilized to their full potential, the company employs a dual-sourcing system for its Peptan F solutions:

## Aquaculture

Fish sourced from regulated freshwater or marine farms

## Wild-caught

Wild fish sourced from oceans, lakes and rivers\*

What's more, on top of its **Upcycled Certified**<sup>®</sup> status, all Peptan F grades carry Friends of the Sea (FOS) certification as standard, while Marine Stewardship Council (MSC) certification for wild-caught varieties is also available at the customers' request.\*\*

At its state-of-the-art factory in France, Rousselot transforms responsibly sourced fish skins into premium collagen peptides. This process follows the strictest quality and safety standards set by major regulatory bodies, including the European Union.

Highly bioavailable and backed by science, like all Peptan solutions, Peptan F ingredients offer instant solubility and excellent sensory properties for seamless formulation and fully satisfied consumers.

**Peptan, sustainability and quality come full circle!**
